Accurate measurements are important!

## Legend

A,B,C - control points of three selected Braille characters

H1,H2,H3 - measured height of each of the three control dots

B1,B2,B3 - measured base diameters of each of the three control points

S1-2,S2-3 - measured distances between points A and B and B and C

■ Compliant result, all measured point meet the requirements in terms of height, diameter of the base and distance
